## High performance chemical solutions

Part of the Fisher Darville Group, Chela Ltd was established in 1988 and is a leading UK manufacturer of high-performance industrial cleaning chemicals. With global distribution, Chela's UK-based state of the art research laboratories specialise in developing innovative technical solutions to specialist cleaning requirements. Our team of scientists develops sustainable cleaning solution for all types of industry including facilities management (FM), The UK Transport Industry, i.e. bus, rail and fleet, stations, general buildings, manufacturing facilities, shopping centres, food manufacturing, local authority and all industry where general or specialist cleaning is required. Chela Ltd also has a strong heritage of supplying high quality cleaning solutions to general industry, public and commercial transport including, rail, road, marine and aviation. Chela Ltd delivers chemical formulations which provide superior cleaning results, are cost effective, and add value to our customers' cleaning processes.

Chela has an experienced team available to offer both practical and technical expert advice and guidance. We have an in-house laboratory for comprehensive material testing in addition to dedicated teams offering training, aftersales service and structured cleaning schedules to improve productivity and efficiency for our customers.

Chela is ISO 9001 and ISO 14001 accredited.

## Our core industries

- All facilities management (FM)
- The UK Transport Industry (i.e. bus, rail and fleet)
- Stations
- General buildings
- Manufacturing facilities
- Cosmetic manufacturing
- Shopping centres
- Food processing and manufacturing
- Local authority
- Schools and education

## Intelligent Plant-Based Cleaners

**A full range of industrial cleaners that are completely plant-based**

Our range of PureClean products are derived specifically from sustainable biomass. General or traditional cleaners start their existence in petroleum form i.e. gas and oil, whilst plant-based solutions begin their existence in biomass form. The use of plant-based solutions allows you to eradicate petroleum sources from your supply chain. Our plant-based PureClean generates a CO<sub>2</sub> saving of 0.12kg per litre utilised.

Chela Ltd. offers a complete recycling service including collection and reuse of cleaning product containers.

## Plant-powered step change

**All our products use plant-based ingredients and we use only PCR Grade packaging.**

## PureClean Carriage Wash

2213

**Plant-based, concentrated, trainwash/buswash/gantry wash detergent**

Superior blend of 100% plant-based detergents designed to provide the highest possible levels of cleanliness standards across train, bus, tram and vehicle exteriors.

- Suitable for use manually and via automatic wash equipment

**Plant-based, concentrated, multi-application cleaner and degreaser with GreenSeal approval**

A high performance cleaner and degreaser, designed to be used across all facets of hard and soft surfaces. Suitable for all cleaning environments including FM, transport, stations, schools, airports and all other applications where sustainable hard surface cleaning is required.

- Suitable for use manually and via automatic wash equipment

**Pack sizes:** 2 x 5L | 15L | 25L | 200L | 1000L IBC

## PureClean HD

4RS

2212

**Plant-based, concentrated, multi-application cleaner and degreaser**

Designed for use in all cleaning environments including FM, transport, stations, schools, airports and all other application where sustainable hard surface cleaning is required.

- Manually via mop and bucket
- Trigger spray use
- Damp rag wipe down
- Scrubber drier equipment
- Pressure washer equipment
- Steam equipment
- Carpet/fabric extraction

**Pack sizes:** 2 x 5L | 15L | 25L | 200L | 1000L IBC

## PureClean HD XL

2218

**Plant-based, powerful, concentrated, cleaner and degreaser for use in all industrial cleaning applications**

Suitable for applications where there are significant or severe levels of soiling, including for use across all hard surfaces. PureClean HD XL is designed for industrial cleaning applications such as grease, oil and particulate soiling removal.

- Manually via mop and bucket
- Trigger spray use
- Damp rag wipe down
- Scrubber drier equipment
- Pressure washer equipment
- Steam equipment
- Carpet/fabric extraction

**Pack sizes:** 2 x 5L | 15L | 25L | 200L | 1000L IBC

**All our products use plant based ingredients and we use only PCR Grade packaging.**

## PureHands

2215

Super premium luxury hand soap designed to be used in all areas of hand cleaning

Superior hand-soap for all skin types.

- Manual application
- Luxury hand soap for all areas
- Suitable for FM, stations and rolling stock

Pack sizes: 12 × 1L | 2 × 5L

## PureGlass

Plant-based, non-smearing glass and mirror cleaner

High performance glass and stainless-steel cleaner designed to leave surfaces clean and streak free.

- Supplied in trigger spray

Pack sizes: 6 × 1L

## PureGel

2214

Plant-based descaler for toilets and urinals

Designed to be suitable for use within the washroom environment where sustainable descaling is required.

- Supplied in ready to use form

Pack sizes: 6 × 1L

## PureGraff

XXXX

Plant-based, concentrated graffiti remover

High performance graffiti remover manufactured with plant based biomass. Effectively removes felt tip pen, magic marker, leather dye and spray paint for a variety of surfaces.

- Supplied in ready to use form

Pack sizes: 10 × 500ml | 1 × 5L

## PureGum

A plant-based remover for chewing gum

Gel based, multi-application gum remover manufactured with plant based biomass technology. Safe for use in removing chewing gum and scuff marks from all types of flooring.

- Supplied in ready to use form

Pack sizes: 10 × 500ml

## PureWash

2216

Plant-based, concentrated washing-up detergent

Washing-up detergent designed to be used within the kitchen environment.

- Supplied in ready to use form

Pack sizes: 12 × 1L | 2 × 5L

## PureSani

2220

Multi-spectrum sanitiser with plant-based additives

Designed to be used across all facets of sanitising and disinfection. Contains plant-based additives

- Supplied as a concentrate and ready to use to use trigger

Pack sizes: 10 × 500ml | 2 × 5L

## Chela 2024 Green Apple Achievement List

The Green Organisation was established in 1994. It is an independent, international, environment group dedicated to recognising, rewarding and promoting environmental best practice around the world. The International Green Apple Environment Awards are presented to companies, councils and communities who are doing their best for the environment.

As a forward-thinking organisation, with a strong scientific heritage and deep-rooted team spirit, Chela is proud to have been awarded Green Apple Environment Awards for innovation and partnership, but we are particularly proud of our many awards for carbon reduction and the contribution we make to reducing the carbon footprint of our business and those of our customers.
